Project Proposal

our project is going to be a IMD site.

The goal of our project is that in the end we will be able

to make a fully functional IMD website.

We hope to make it the best that we can so that

the whole world can see our great work.

The intended audience is future students and future

employers.

We plan to collaborate through each person working on

separate tasks, and in the end us all bringing our separate

tasks tougher in order to make it complete.

We would also periodically make sure that all of our parts

work together and are in unity.
